EDUCATION

Purdue University

Bachelor of Science in Computer Science

Fort Wayne, IN

Expected June 2027

EXPERIENCE

Intern

June 2026 – August 2026

Consult America

Hagerstown, Maryland

- Worked with a team to research and evaluate ideas for AI agent applications and potential business use cases.
- Proposed AutoGenie, an AI agent concept for finding vehicles based on user preferences and assisting with the car-buying process.
- Researched methods for accessing online vehicle listings and identified limitations with websites that do not provide public APIs.
- Contributed to business requirements, project planning, and documentation before development.

Intern

May 2023 – July 2023

Federal Board of Revenue

Karachi, Pakistan

- Shadowed employees across multiple departments to learn how technology and administrative systems support government operations.
- Gained exposure to database systems, employee management systems, tax administration, and departmental workflows.

PROJECTS

Web Search Engine | *C, Python, Data Structures, TF-IDF*

Nov 2025 - Dec 2025

- * Developed a web search engine capable of crawling, indexing, and retrieving web pages using custom-built data structures
- * Implemented a trie-based indexing system to efficiently store and search keywords across thousands of documents
- * Built a TF-IDF ranking algorithm to score and rank search results based on relevance to user queries

Multi-Threaded Web Server | *C, Linux, POSIX Threads, Socket Programming*

Apr 2025

- * Developed a concurrent web server capable of handling multiple client requests simultaneously using POSIX threads
- * Implemented socket-based client-server communication and HTTP request processing
- * Designed thread management and synchronization mechanisms to improve server responsiveness under concurrent workloads
- * Tested server functionality and concurrent request handling in a Linux environment.

Student Marketplace | *Python, JSON, Javascript*

Aug. 2025 - Dec 2025

- * Collaborated with a team to develop a student marketplace for buying and selling used college supplies.
- * Contributed to feature planning and debugging for user accounts, product listings, wish lists, offers, and buyer-seller communication.

TECHNICAL SKILLS

Languages: Java, Python, C

Technologies: Linux, Git, GitHub, JSON, VS Code

Concepts: Data Structures, Algorithms, Multithreading, Networking, Object Oriented Programming(OOP)

Certifications: CS50

ADDITIONAL INFORMATION

Languages: English, Urdu, Sindhi, Marwari, Rajishtani
